

SAFETY MEASURES

- We would like all our valuable customers to know that we have been working hard to ensure everyone can relax in a safe environment. The following measures have been implemented in line with government guidelines.
- Upon arrival we would like customers to use the hand sanitiser at the door. We would also request that they sign the track and trace book leaving a name and contact number and stating time of arrival.
- We have a single file one way system in operation. Please can customers queue single file on the green markers. At the front of the queue please stay at the taped line to keep a safe distance from your server. Once served please leave through the other side.
- We have put in place thorough cleaning procedures of all areas. All team members will be fully trained on the new procedures. Their temperatures will be checked on arrival at work and this information will be logged. Staff members will not be allowed to work if there are any concerns.
- We advise that the maximum people in the Mens or Ladies toilets at one time be kept to two.
- Our restaurant capacity has been reduced to enable more space between customers.
- PPE is not recommended for restaurant staff as per government guideline.
